How do you prepare for today's competitive engineering world?

SPAC Conference
March 24, 2006
Graduate Life Center
(formerly Donaldson-Brown Conference Center)
Multipurpose Room
www.ieee.vt.edu

Engineers must be proficient, professionally astute, and clearly aware of their responsibility to society. Student Professional Awareness Conferences (SPAC's) explore the subjects that affect engineers' careers, regardless of how well engineers prepare themselves technically. In business today, engineers must be able to deal with all the nontechnical aspects of their career. Students graduate knowing how to design circuits and write code. But, ask them to plan a meeting, organize a presentation, or develop an annual budget and, most likely, they'll be overcome with apprehension. Why? Because engineering schools are reluctant to add these nontechnical skills to an already full curriculum. In reality, these nontechnical competencies are just as critical to engineers' futures as their technical training.

Come listen to IEEE National speakers and local Virginia Tech speakers, get a chance to network with professionals of various fields, and have a good time!

2PM - 5PM
open to all majors

Guest Speakers:
Dan Sable of VPT, Inc.
Jim Peterman of Tekelec

Prizes:
Dell Axium X51
Gift Certificates
....and more!

Registration:
